Task - 1 : AI-Assisted Personal Portfolio Website
A student wants to showcase academic projects, technical skills, and contact information through a personal portfolio website. AI tools are used to speed up development while maintaining quality and customization.

Prompt : Generate a clean and responsive personal portfolio website using HTML and CSS.

Requirements:

- Use semantic HTML with sections: Home, About, Projects, Contact, and Footer
- Add a navigation bar with smooth scrolling links
- Use Flexbox for navbar and layout, and CSS Grid for project cards
- Create 3 project cards with title and description
- Add hover effects on project cards (lift + shadow + smooth transition)
- Make the navbar sticky
- Ensure full responsiveness for mobile (max-width: 768px)
- Use a modern, minimal design with good spacing and typography

Keep the code simple, well-structured, and beginner-friendly.

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>My Portfolio</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<!-- Navbar -->
<nav>
    <h2 class="logo">MyPortfolio</h2>
    <ul>
        <li><a href="#home">Home</a></li>
        <li><a href="#about">About</a></li>
        <li><a href="#projects">Projects</a></li>
        <li><a href="#contact">Contact</a></li>
    </ul>
</nav>

<!-- Home -->
<section id="home" class="section">
    <h1>Hello, I'm Vineet 👋</h1>
    <p>Aspiring Software Developer</p>
</section>

<!-- About -->
<section id="about" class="section">
    <h2>About Me</h2>
    <p>I am a student passionate about web development, AI, and cybersecurity.</p>
</section>

<!-- Projects -->
<section id="projects" class="section">
    <h2>Projects</h2>
```

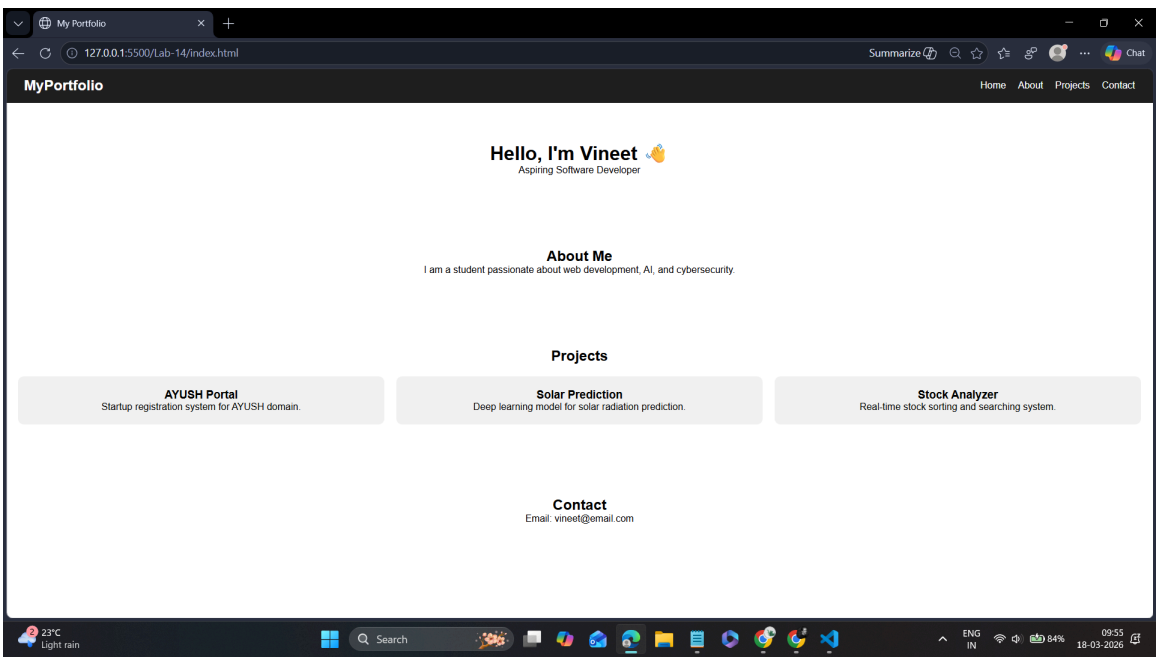
Output :



Task – 2 : AI-Generated Restaurant Landing Page

A local restaurant requires a simple yet attractive landing page to display its offerings. The developer uses AI assistance to rapidly generate UI components.

Prompt : Generate a responsive restaurant landing page using HTML, CSS, and JavaScript.

Requirements:

- Create a navigation bar with links: Home, Menu, Gallery, Contact (sticky and responsive using Flexbox)

- Design a Menu section with food items displayed as CSS cards (title, description, price)
- Implement a Gallery section with a JavaScript image slider (auto-slide + next/prev buttons)
- Add smooth animations and transitions (hover effects, fade/slide effects)
- Ensure the website is mobile-friendly (max-width: 768px)
- Use a modern, clean, and attractive design suitable for a restaurant

Keep the code simple, well-structured, and beginner-friendly.

ScreenShots :

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Foodie's Restaurant</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

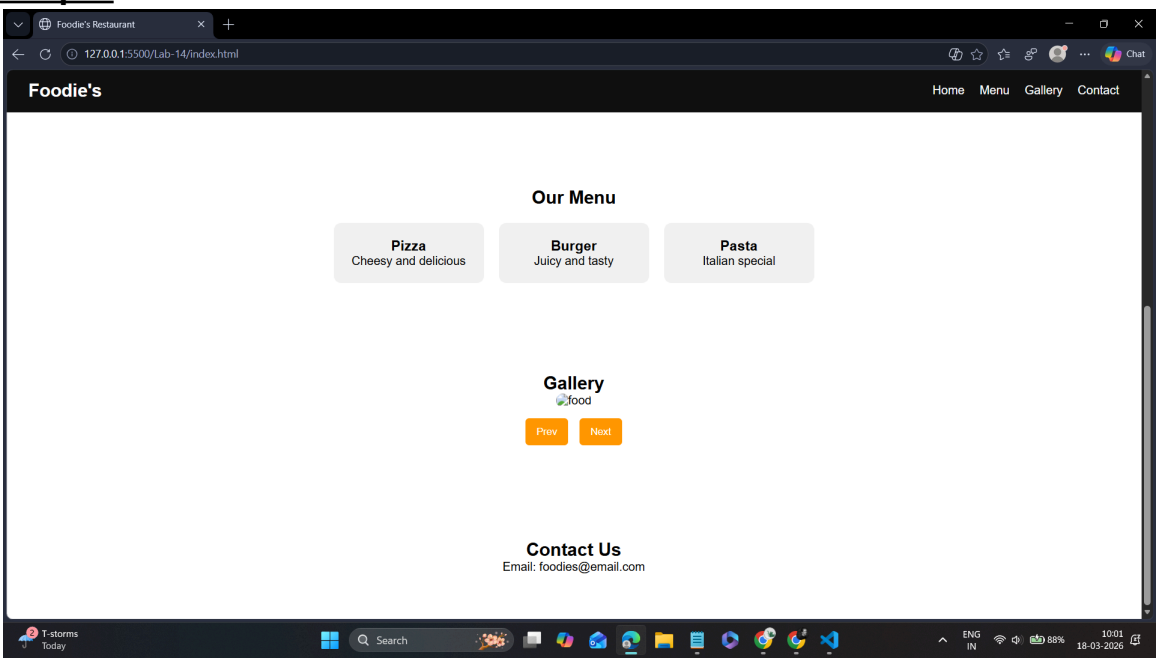
<!-- Navbar -->
<nav>
    <h2 class="logo">Foodie's</h2>
    <ul>
        <li><a href="#home">Home</a></li>
        <li><a href="#menu">Menu</a></li>
        <li><a href="#gallery">Gallery</a></li>
        <li><a href="#contact">Contact</a></li>
    </ul>
</nav>

<!-- Home -->
<section id="home" class="section home">
    <h1>Welcome to Foodie's Restaurant 🍔</h1>
    <p>Delicious food, delivered with love</p>
</section>

<!-- Menu -->
<section id="menu" class="section">
    <h2>Our Menu</h2>

    <div class="menu-container">
        <div class="menu-card">
            <h3>Pizza</h3>
            <p>Cheesy and delicious</p>
        </div>
```

Output :



Task-3 : AI-Powered Event Registration Form

SR University is hosting a technical fest and requires an online registration form with real-time validation to ensure accurate user input.

Prompt : Generate a responsive and user-friendly event registration form using HTML, CSS, and JavaScript.

Requirements:

- Include fields: Name, Email, Phone Number, Department (dropdown), Event Selection (dropdown)
- Use semantic HTML and proper labels for accessibility
- Style the form with modern CSS (centered layout, clean spacing, focus effects, responsive design)
- Ensure the form is fully visible with proper scrolling (no content cut-off)
- Implement real-time validation using JavaScript:
  - Required field checks
  - Email format validation
  - Phone number must be 10 digits
- Show error messages below inputs and highlight fields (red for error, green for success)
- Prevent form submission if inputs are invalid
- Keep the code simple, clean, and beginner-friendly

ScreenShots :

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Event Registration</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<div class="container">
    <h2>SR University Tech Fest Registration</h2>

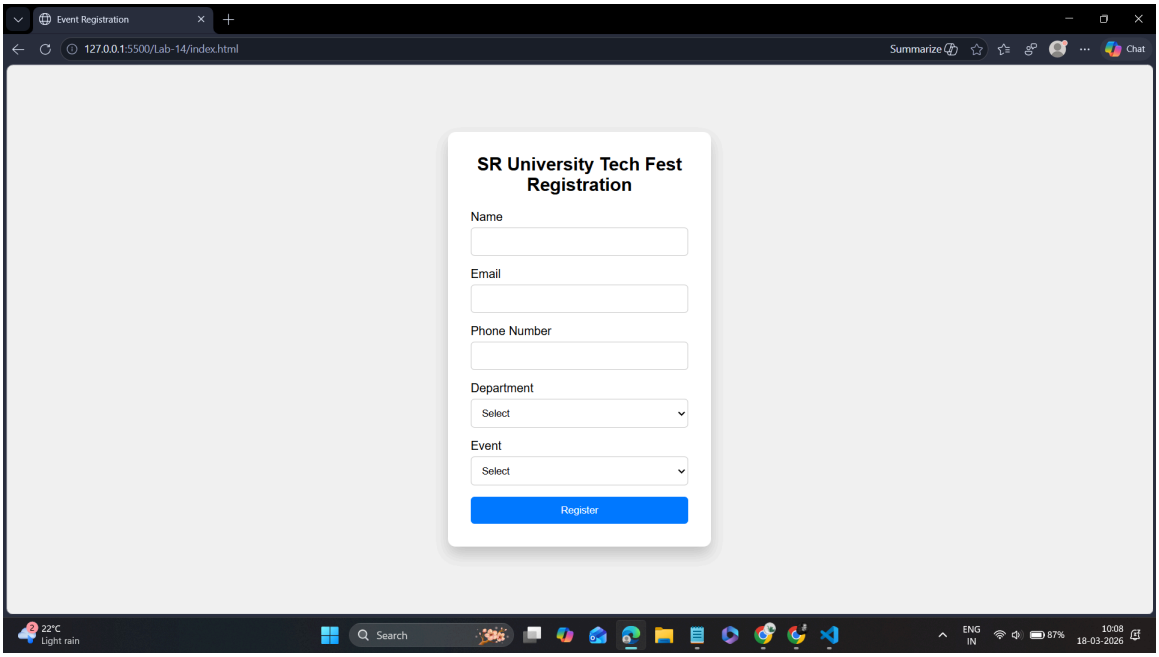
    <form id="form">
        <!-- Name -->
        <div class="input-group">
            <label>Name</label>
            <input type="text" id="name" required>
            <small class="error"></small>
        </div>

        <!-- Email -->
        <div class="input-group">
            <label>Email</label>
            <input type="text" id="email" required>
            <small class="error"></small>
        </div>

        <!-- Phone -->
        <div class="input-group">
            <label>Phone Number</label>
            <input type="text" id="phone" required>
            <small class="error"></small>
        </div>

        <!-- Department -->
        <div class="input-group">
```

Output :



Task-4 :AI-Assisted E-Commerce Product Page

A startup is developing a basic e-commerce product page to showcase products and manage simple cart functionality.

Prompt : : Generate a responsive e-commerce product page using HTML, CSS, and JavaScript.

Requirements:

- Display products in a grid with image, name, price, and "Add to Cart" button
- Add cart functionality using JavaScript
- Show a cart counter at the top-right corner
- Update the counter when items are added
- Provide visual feedback when clicking "Add to Cart" (animation or message)

Use only vanilla JavaScript and keep everything in a single HTML file.

Screenshots :

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>E-Commerce</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<!-- Navbar -->
<nav>
    <h2>ShopEasy</h2>
    <div class="cart">
        🛒 <span id="cart-count">0</span>
    </div>
</nav>

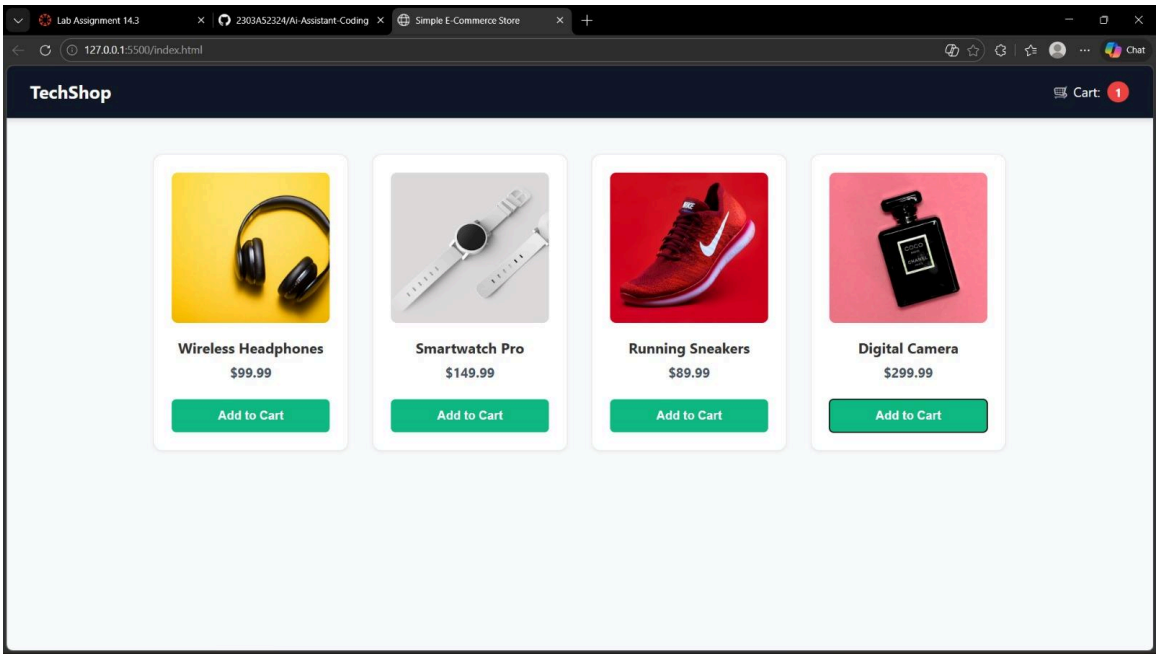
<!-- Product Section -->
<section class="products">

    <div class="product">
        <h3>Headphones</h3>
        <p>₹1500</p>
        <button onclick="addToCart()">Add to Cart</button>
    </div>

    <div class="product">
        <h3>Smart Watch</h3>
        <p>₹3000</p>
        <button onclick="addToCart()">Add to Cart</button>
    </div>

    <div class="product">
        <h3>Mobile</h3>
        <p>₹15000</p>
        <button onclick="addToCart()">Add to Cart</button>
```

Output :



Task-5 : Create a Responsive Web Page Layout
Design a basic web page layout with a header, main content area, and footer using HTML and CSS.
Use AI to assist in generating responsive CSS for different screen sizes.
Ensure the layout is clean and visually organized.

Prompt : Generate a responsive web page layout using HTML and CSS.
Requirements:
- Include a header with navigation links

- Add a main content section with text and placeholder images
- Add a footer with copyright or contact information
- Use CSS (Flexbox or Grid) for layout
- Make the design responsive for desktop, tablet, and mobile using media queries
- Keep the design clean and organized

Provide the full code in a single HTML file.

Screenshots :

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Responsive Layout</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<!-- Header -->
<header>
    <h2>My Website</h2>
    <nav>
        <a href="#">Home</a>
        <a href="#">About</a>
        <a href="#">Services</a>
        <a href="#">Contact</a>
    </nav>
</header>

<!-- Main Content -->
<main>
    <section class="content">
        <h1>Welcome to My Website</h1>
        <p>This is a responsive web page layout designed using HTML and CSS.</p>
        <img src="https://source.unsplash.com/800x400/?technology" alt="image">
    </section>

    <aside class="sidebar">
        <h3>Sidebar</h3>
        <p>Additional information or links can go here.</p>
    </aside>
</main>

<!-- Footer -->
<footer>
```
